About the Authors

JEFFREY D. DILLMAN, is the Executive Director of the Housing Research & Advocacy Center (the Housing Center). He received his J.D. from Boalt Hall School of Law, University of California, Berkeley, and has practiced civil rights, consumer, and immigration law for over 17 years.

CARRIE PLEASANTS is the Director of Research & Investigations at the Housing Center. She received her M.A. in Geography, with an emphasis on Urban Geography, from Kent State University and has conducted a number of research projects at the Housing Center related to lending discrimination and impediments to fair housing.

SAMANTHA HOOVER is the Housing Center's Fair Housing Research Associate. She is currently finishing her Bachelor of Arts from the Honors College at Kent State University, where she is majoring in English and Sociology.

Additional research assistance was provided by MERAN CHANG, an intern at the Housing Center, and HOPE FARMBY, the Housing Center's Fair Housing Specialist. GAY QUEREAU provided additional assistance editing this report.

Acknowledgments

The work that provided the basis for this publication was supported by funding under a grant with the U.S. Department of Housing and Urban Development. The substance and findings of the work are dedicated to the public. The authors and publisher are solely responsible for the accuracy of the statements and interpretations contained in this publication. Such interpretations do not necessarily reflect the view of the Federal Government.

We wish to thank Professor David Kaplan, Kent State University, for his assistance and the U.S. Department of Housing and Urban Development (HUD) for the data they provided regarding housing complaints. In addition, we would like to thank local government officials for answering questions about and providing copies of fair housing ordinances which we have analyzed in this report.

About the Housing Research & Advocacy Center

The Housing Research & Advocacy Center (the "Housing Center") is a 501(c)(3) non-profit organization whose mission is to eliminate housing discrimination and assure choice in northeast Ohio by providing those at risk with effective information, intervention and advocacy. The Housing Center works to achieve its mission through work in three primary areas: research and mapping, education and outreach, and enforcement of fair housing laws through testing and litigation. In addition to addressing traditional issues of housing discrimination and segregation, the Housing Center also provides research, education, and analysis of subprime and predatory lending practices and trends in the region.

I. Executive Summary

Housing discrimination has been a persistent problem in our region and country. The level of discrimination we face today, as well as the segregated housing patterns of our region, are a result of decades of official and unofficial policies of governments at all levels, of private businesses and associations, and of individual actions by homeowners, rental agents, and others. Without the actions of all of these individuals and entities, not only would we face less segregation and discrimination as a society, but there would be less economic stratification, as housing patterns affect not only where one lives but, in many respects, one's life chances through access to quality schools, transportation, jobs, and a healthy environment.

This report is the Housing Center's third annual comprehensive survey of fair housing in northeast Ohio.¹ The report finds that 40 years after the passage of the federal Fair Housing Act – which prohibits discrimination based on race, color, religion, sex, national origin, familial status, and handicap – housing discrimination is still widespread in the region.

In the last five years for which data are available (2003-2007), on average 140.2 complaints of housing discrimination were filed in the region annually with the U.S. Department of Housing and Urban Development (HUD), up from an average of 74.8 for the period 1998-2002. The increase in cases filed is due to a doubling of the number of cases brought for discrimination based on disability (from 101 to 230), and a 75% increase in the number of cases brought based on race (from 138 to 242). During this period, the number of cases brought based on religion, sex/gender, familial status (families with children), and national origin also increased, and the number based on color remained constant. The most common bases of discrimination alleged in complaints filed in 2003-2007 were race (34.5% of complaints filed), disability (32.8%), and familial status (12.8%).

While the increase in cases filed is significant, it is clear that it represents only a small fraction of the total number of instances of housing discrimination in the region. By examining moving patterns of different racial and ethnic groups and comparing this to discrimination rates found in a recent national study, the Housing Center estimates that there are annually at least 33,690 instances of housing discrimination in the region against African Americans, Hispanics/Latinos, and Asian Americans and Pacific Islanders.

The level of housing segregation has decreased marginally for African Americans since 1980, with the region moving from the third-most segregated area in the country to the sixth-most segregated. For Hispanics/Latinos, the region has gone from the seventh-most segregated in 1980 to the eleventh-most segregated in 2000, although this "improvement" has not been accompanied by any decrease in segregation for Hispanics/Latinos but rather has been based on

¹For purposes of this report, we have examined a six-county region made up of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, and Medina Counties.

other regions becoming more segregated.

While the level of segregation and number of instances of discrimination in the region are high, some local communities have taken steps to address housing discrimination by passing local fair housing legislation. A total of 35 local governments in Cuyahoga County have passed fair housing ordinances, compared to 3 in Ashtabula County, 3 in Lake County, 9 in Lorain County, and 4 in Medina County. There are no local fair housing ordinances in Geauga County.

Although many of these statutes merely recodify federal and state law without offering additional protection to individuals, a number of the statutes also prohibit discrimination on other bases, thus providing protection to additional classes of people. The grounds protected by local ordinances (and the number of jurisdictions providing such protection) include age (19 ordinances), creed (19), marital status (18), sexual orientation (7), ethnic group (2), disabled veteran status (2), Vietnam veteran status (2), and occupation (1).

Home mortgage lending data revealed disparities in lending based on both race and ethnicity. Upper income African Americans were more likely to be denied both home purchase and refinance loans than low income whites. For those individuals who obtained loans, upper income African Americans were more than two and a half times more likely to obtain high-cost home purchase loans as low income whites (62.8% compared to 24.5%). For refinance loans, upper income African Americans received high cost loans 55.8% of the time, compared to 32.0% of the time for low income whites.

For our region to successfully confront and eliminate housing discrimination will require concrete action on behalf of the victims of housing discrimination and creative solutions that move beyond current laws. Among the Housing Center's recommendations are:

- enacting stronger fair housing laws that prohibit discrimination based on additional grounds (such as source of income to prohibit discrimination against individuals who rely on housing subsidies);
- vigorously enforcing fair housing laws at all levels, including the use of systemic testing for discrimination to both punish individuals who violate fair housing laws and deter future violations of the act;
- implementing comprehensive education efforts for housing providers, renters and homeowners to ensure that individuals are aware of fair housing laws and the means available to enforce them;
- developing creative solutions to housing discrimination and racial and economic segregation;
- increasing investigations of mortgage lenders to ensure that they provide fair access to credit and are adequately complying with the Fair Housing Act and other anti-discrimination statutes to provide loans in a non-discriminatory manner.

II. Demographics of the Region

Fair housing laws provide protection from discrimination to all members of our society, not only members of racial or ethnic minorities. For example, the prohibitions on race discrimination prohibit discrimination not only against African Americans or other racial minorities but against *any* person on account of his or her race. Likewise, the provisions on religious discrimination prohibit not only discrimination against members of minority religions but adherents to any religion (as well as those who are not religious).

While every individual in our society therefore is provided with protection by fair housing laws, the history of discrimination in our country has demonstrated that it is members of minority groups – whether racial, religious, ethnic, national origin, or other – that face discrimination most often and with the most severe consequences. Thus, the chances of a white individual facing racial discrimination are much lower than the chances of an African American (or Hispanic or Arab American) facing such discrimination. As such, we provide below an overview of the demographics of the region, with a focus on its racial and ethnic make-up, as well as the characteristics of the population protected by federal and state fair housing laws.

A. Region Covered

This report covers the state of fair housing in northeast Ohio. For purposes of this report, the area consists of the counties of Ashtabula, Cuyahoga, Geauga, Lake, Lorain, and Medina. This area was chosen because up until 2000, it represented the Metropolitan Statistical Area (MSA) used by the U.S. Census Bureau to describe the region.²

B. Population of the Region

From 1970 to 2006, the population of the area covered by this report has decreased by 8.4%, from 2,419,274 to 2,216,858, at a time when the population of the country as a whole increased 47.3%.³ Changes in county-level populations have varied from an increase of 104.7% for Medina County to a 23.6% decrease in Cuyahoga County.⁴

²In 1990, this area comprised the Cleveland-Elyria-Lorain Metropolitan Statistical Area (MSA). In 2000, the Census Bureau modified the MSA to remove Ashtabula County and renamed the region as the Cleveland-Elyria-Mentor MSA. We have included all six counties in this report to allow a comparison over time of the demographics, as well as the fair housing complaints, in the region.

³See U.S. Census Bureau, “Table 4. Population: 1790-1990,” *1990 Census of Population and Housing*; U.S. Census Bureau, 2006 American Community Survey.

⁴For data sources for all tables and charts, see Appendix E.

Table 1: Population of Region by County

	1970	1980	1990	2000	2006	% Change from 1970 to 2006

Source: U.S. Census.

Overall, the racial makeup of the six-county region has become more diverse over the past 36 years. During this time period, the percentage of population that is white has decreased from 85.0% in 1970 to 77.7% white in 2006.⁵ The percentage of African Americans has increased in this period from 14.6% to 19.1%, while the number of Asians and Pacific Islanders has more than doubled from 0.6% in 1980 to 1.8% in 2006.

Table 2: Race of Population in Region⁶

	1970		1980		1990		2000		2006

Source: U.S. Census.

⁵This report analyzes the racial make-up of each of the counties through 2006, the last year racial data are available from the Census Bureau for all of the counties studied. All 2006 data were obtained from the 2006 Population Estimates which are made by the U.S. Census Bureau. Data for 1970 through 2000 are from the decennial censuses and are based on actual counts.

⁶Notes: NR = not reported. In 1970, the only racial categories listed for total county populations were “White” or “Negro.” In 1980 and 1990, the Census Bureau added “American Indian, Eskimo and Aleut” and “Asian and Pacific Islander.” In 2000, the Census Bureau reported “Asian” separate from “Native Hawaiian and other Pacific Islander.” For this table, these two categories were combined to allow for easier comparison to 1980 and 1990, when the Census Bureau reported them in one category, and because of the relatively small number of individuals in these groups in northeast Ohio. This chart does not include individuals who reported “Other races” in any of the years. Racial data for each of the six counties in this report are provided in Appendix A.

According to the Census Bureau, the Hispanic/Latino population of the region increased from 1.8% in 1980 to 3.8% in 2006, with Lorain County (7.1%) and Cuyahoga County (3.8%) having the highest percentages.

Table 3: Hispanic or Latino/a Population⁷

	1980		1990		2000		2006	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Ashtabula	1,119	1.1	1,538	1.5	2,292	2.2	2,795	2.7
Cuyahoga	24,028	1.6	31,447	2.2	47,078	3.4	50,354	3.8

Source: U.S. Census.

The percentage of foreign born population in the region (who would be protected under fair housing laws based on the prohibition of discrimination based on national origin) was 5.6% for the region in 2006, up slightly from the rate of 5.1% in 2000. The lowest rate was 1.9% in Ashtabula County, and the highest rate was 7.0% in Cuyahoga County.

Table 4: Percent of Population that is Foreign Born

	2000		2006	
	Number	Percent	Number	Percent
Ashtabula	1,619	1.6	1,919	1.9

Medina	4,550	3.0	5,547	3.3
Total	114,625	5.1	123,377	5.6

Source: U.S. Census.

In response to widespread discrimination against families with children, Congress amended the Fair Housing Act in 1989 to prohibit discrimination based on familial status. In 2006, 31.7% of households in the region contained an individual under 18 years of age, ranging from a low of 30.0% in Cuyahoga County to a high of 38.2% in Geauga County.

⁷According to the Census Bureau, “Hispanic” and “Latino” are not racial designations, and individuals may be of any race. The Census Bureau did not report the number of “Hispanic” or “Latino” individuals on a county-wide basis in 1970.

Table 5: Households with Individuals Under 18

	2000		2006	
	Number	%	Number	%
Ashtabula	14,014	35.6	14,139	35.6

Total	298,048	33.4	277,064	31.7

Source: U.S. Census.

In 1989, Congress also amended the Fair Housing Act to prohibit discrimination based on handicap. In 2006, 13.2% of the population between the ages of 16 and 64 were disabled, with a low of 8.4% in Medina County and a high of 17.5% in Ashtabula County. For people 65 years of age and older, 38.9% of the population in the region was disabled, with a low of 31.0% in Geauga County and a high of 47.4% in Ashtabula County. Among children aged 5-15 years, 7.2% were disabled, with a low of 4.1% in Ashtabula County and a high of 7.9% in Geauga County.

Table 6: Population With a Disability in 2006

	5 to 15 years		16 to 64 years		65 years and over	
	Number	Percent	Number	Percent	Number	Percent

Source: U.S. Census.

In addition to prohibiting discrimination based on handicap, the 1989 amendments to the Fair Housing Act also required that certain new multifamily housing be constructed with certain accessible features to ensure that disabled individuals were able to have greater housing options. While single-family housing is not required to meet these accessibility standards, newer single-family homes tend to be more accessible to individuals with mobility impairments and certain other physical disabilities compared to older homes. Thus, the age of housing in a region is often an indication of the amount of housing that is potentially more accessible to individuals with certain physical disabilities. In the region, 5.0% of the housing stock overall was built from 1995 to 2000, ranging from a low of 2.8% in Cuyahoga County to a high of 14.9% in Medina County. Additionally, 35.9% of the housing in the region was built prior to 1950, with a low of

17.5% for Medina County to a high of 42.3% for Cuyahoga County.⁸

Although fair housing laws prohibit discrimination in rentals as well as purchases of housing,⁹ more housing discrimination cases are brought for discrimination in the rental, rather than sales, context.¹⁰ In the six-county region, 73.6% of all housing units were owner-occupied in 2006, leaving 26.4% as rental properties. In 2006, Cuyahoga County had the lowest percentage of owner-occupied housing, at 69.3%.

Table 8: Percentage of Owner-Occupied Housing in Region

⁸The 2006 estimates from the U.S. Census Bureau's American Community Survey were not used because of the relatively high margin of error associated with that portion of the survey.

⁹For a full description of the provisions of the federal, state, and local fair housing statutes, see Section III, below.

¹⁰See National Fair Housing Alliance, "2006 Fair Housing Trends Report," April 5, 2006, p. 19.

¹¹Percentage taken from 2005, as 2006 data are not available for Geauga County.

III. Fair Housing Laws in Northeast Ohio

The purpose of fair housing laws is to counteract the effects of housing discrimination in our society. Laws prohibiting discrimination in housing are found at the federal, state, and, in some jurisdictions, local level.¹² Which law or laws apply in a given situation depend on where the property in question is located and/or where the alleged discriminatory act took place.

Generally, Ohio law is broader than federal law, providing more protection to potential victims of discrimination. Some local laws provide even further protections within their communities than does Ohio law, while in other communities with local legislation, Ohio law remains the broadest in terms of protection. Below is a brief summary of the federal, state, and local fair housing laws in northeast Ohio.

A. Federal Law

The federal Fair Housing Act (42 U.S.C. §3601, *et seq.*) was passed by Congress in 1968 to help remedy the history of housing discrimination that existed (and continues to exist) throughout the country.

The Fair Housing Act makes it unlawful, on account of one of the classes protected by the statute, to

- refuse to sell or rent a dwelling;¹³
- refuse to negotiate for the sale or rental of a dwelling;
- otherwise make unavailable or deny a dwelling;
- discriminate in the terms, conditions, or privileges of the sale or rental of a dwelling;
- discriminate in the provision of services or facilities in connection with a dwelling;
- make discriminatory advertising or statements with respect to the sale or rental of a dwelling;
- indicate any discriminatory preference or limitation with respect to the sale or rental of a dwelling;
- misrepresent the availability of a dwelling;

¹²In addition to federal, state, and local fair housing laws discussed below in this report, there are a number of other federal statutes that provide protection to individuals from discrimination in housing and mortgage lending. These statutes include: the Civil Rights Act of 1866 (42 U.S.C. §1981 and §1982), the Americans with Disabilities Act (ADA) (42 U.S.C. §1201, *et seq.*), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. §794), Title VI of the Civil Rights Act of 1964 (42 U.S.C. §2000d, *et seq.*), the Equal Credit Opportunity Act (15 U.S.C. §1691, *et seq.*), and the Housing and Community Development Act (42 U.S.C. §1437, *et seq.*).

¹³In certain circumstances, the owner of a single-family home may be exempt from coverage under the federal Fair Housing Act. In addition, under the “Mrs. Murphy” exemption, an owner-occupied complex of four or fewer units may be exempt from coverage under the statute. These exemptions do not exist under Ohio’s fair housing law.

- engage in “blockbusting;”¹⁴
- discriminate in the financing of residential real estate related transactions;
- discriminate in the provision of brokerage services;
- coerce, intimidate, threaten, or interfere with any person in the exercise of his or her rights under the Act or retaliate against an individual for exercising his or her rights under the Act.

The federal Fair Housing Act prohibits discrimination based on seven grounds: race, color, religion, national origin, sex, familial status, and handicap.¹⁵ “Familial status” is defined under the Fair Housing Act to mean one or more individuals under 18 years of age living with a parent, legal custodian, or the designee of such a parent or legal custodian. In addition, the provision protects individuals in the process of securing legal custody of a minor and pregnant women. 42 U.S.C. §3602(k). A “handicap” is defined under the Fair Housing Act to include a physical or mental impairment which substantially limits one or more major life activity, a record of having such an impairment, or being regarded as having such an impairment. 42 U.S.C. §3602(h).

The Fair Housing Act can be enforced by the U.S. Department of Justice, the U.S. Department of Housing and Urban Development (HUD), and through private lawsuits brought by individuals or organizations that have experienced discrimination.

B. Ohio Law

In addition to being covered by the federal Fair Housing Act, residential property in Ohio is also covered by Ohio’s state law governing fair housing (Ohio Revised Code 4112.02(H)). The Ohio statute is broader than the federal Fair Housing Act in several important respects. First, in addition to prohibiting discrimination based on all of the classes protected by federal law (race, color, religion, national origin, sex, handicap and familial status), Ohio law also prohibits discrimination based on two additional grounds: “ancestry,” a somewhat different and potentially broader category than “national origin,” and, as of March 2008, military status.¹⁶ Second, while federal law contains several provisions that exempt certain residential property from coverage,

¹⁴“Blockbusting” refers to encouraging homeowners to sell their homes quickly (and often at below market rates) by creating a fear that members of a minority group are moving into the neighborhood.

¹⁵In passing the Act in 1968, Congress prohibited discrimination based on race, color, religion, and national origin. (Civil Rights Act of 1968, Title VIII, Pub. L. No. 90-284.) Discrimination based on sex (including sexual harassment) was prohibited by a 1974 amendment. (Housing and Community Development Act of 1974, Pub. L. No. 93-383, §808.) In 1988, Congress amended the Act to include familial status and handicap as protected classes. (Fair Housing Amendments Act of 1988, Pub. L. No. 100-430.)

¹⁶Military status was added as a protected class in 2008, and therefore is not included as a protected class in the complaint data.

Ohio's statute does not include these exemptions, making Ohio's fair housing law applicable to almost all housing in the state.¹⁷

C. Local Law

In addition to the federal and state statutes, which apply throughout the State of Ohio, numerous counties, cities, and villages in northeast Ohio have passed ordinances covering fair housing.

Locally, 35 governments in Cuyahoga County have fair housing ordinances, compared to 3 in Ashtabula County, 3 in Lake County, 9 in Lorain County, and 4 in Medina County. (There are no local fair housing ordinances in Geauga County.)¹⁸

While some of these ordinances provide the same protection as federal or state law, others are broader, offering protection from discrimination to additional classes of individuals.¹⁹ The additional classes protected by cities in the region (and the number of local jurisdictions protecting them) include age (19), creed (19), marital status (18), sexual orientation (7), ethnic group (2), disabled veteran status (2), Vietnam veteran status (2), and occupation (1).

Table 9 provides a comparison of the local fair housing laws passed by villages, cities, and counties in the six-county region covered by this report, including the classes protected from discrimination by each ordinance. In addition, the table indicates which jurisdictions have a complaint procedure and/or a local fair housing board to investigate complaints.

¹⁷The "Mrs. Murphy" exemption (for an owner-occupied complex of four or fewer units) and the exemption for the sale and rental of an owner's single-family home are not included in Ohio's fair housing law. Under both Ohio and federal law, certain noncommercial property owned by religious organizations and private clubs may be exempt from fair housing laws in certain circumstances. In addition, senior housing is exempt from the familial status provisions under both statutes.

¹⁸For purposes of this report, we consider local fair housing ordinances to be laws that prohibit discrimination in housing transactions. Two counties (Lorain and Medina) passed resolutions making housing discrimination illegal. We have included these as fair housing ordinances. In addition to the ordinances listed here, a number of jurisdictions have ordinances criminalizing intimidation in housing. The jurisdictions with intimidation ordinances only include: Avon, Avon Lake, Brooklyn Heights, Cuyahoga Heights, Jefferson Village, Lyndhurst, Mayfield Heights, Middleburg Heights, Pepper Pike, Solon, and Wadsworth. Because these ordinances are criminal intimidation statutes, we do not include them in Table 9 or this analysis of local fair housing laws.

¹⁹Some of these statutes are narrower than federal or state law. In those cases, the broader protections offered by state and/or federal law would apply.

Table 9: Local Fair Housing Laws in the Region

IV. Fair Housing Complaints in Northeast Ohio

A. Federal and State Complaint Process

Under the federal Fair Housing Act, individuals who have suffered discrimination may choose to file an administrative complaint before the U.S. Department of Housing and Urban Development (HUD), a lawsuit in court, or both. Because Ohio's fair housing law has been designated substantially similar to the federal statute, virtually all housing discrimination complaints filed with HUD are referred to the Ohio Civil Rights Commission (OCRC) for investigation and potential resolution.²⁰

Ohio's fair housing law also allows individuals to pursue remedies administratively before the OCRC or in court. In addition to investigating cases referred by HUD, the OCRC accepts complaints of housing discrimination filed with the agency directly.²¹

Once the OCRC receives a complaint (or "charge"), the agency assigns it to an investigator. The investigator researches the complaint, speaking with the parties and witnesses and reviewing any available documentation to determine if there is probable cause of discrimination. Prior to making the decision, the OCRC offers the parties the opportunity to voluntarily mediate their dispute. If both parties agree, a mediator meets with the parties and attempts to find a mutually satisfactory resolution. If a settlement is not reached, the case continues to be investigated.²²

After the investigator has reached a recommendation, the case is submitted for supervisory approval and ultimately to the Commissioners, who must approve the report before it becomes a final OCRC finding. Based on its review of the report and recommendation of the OCRC's field staff, the Commission makes a finding of "probable cause" or "no probable cause" of discrimination.

If the OCRC finds probable cause of discrimination, the parties are offered a final chance to resolve their differences through a conciliation process. In the event that the dispute cannot be resolved, the case is referred to the Civil Rights Section of the Ohio Attorney General's Office to bring a civil action before an administrative hearing officer or, if the parties request, in state court.

²⁰According to the agreement between HUD and the OCRC, with several small exceptions, fair housing complaints from Ohio that are filed with HUD are referred to the OCRC for investigation and resolution. In 2005, less than one percent of cases were investigated by HUD. (Email communication with Carolyn Murphy, Director of Columbus Fair Housing Center, U.S. Department of Housing and Urban Development, March 10, 2006.)

²¹The procedures of the OCRC are set forth in ORC 4112.03-4112.06 and in the Ohio Administrative Code 4112-3-01 through 4112-3-17.

²²The Commission has the authority to demand access to records, premises, documents, evidence or possible sources of evidence, and to record testimony or statements from individuals. Further, the agency has the right to issue subpoenas, interrogatories, cease and desist orders, hold public hearings, and collect monetary benefits.

B. Number of Complaints Filed in Region

The Housing Center has collected and analyzed data on all fair housing complaints filed in the six-county region with HUD 1990 through 2007.²³ The data reveal that over the 18-year period:

- on average, 112.6 complaints were filed each year in the region;
- cases filed alleging race discrimination accounted for 41.9% of the total, compared to 23.3% for handicap, and 18.0% for familial status;
- complaints based on sex/gender accounted for only 4.5% of the total, national origin cases made up 6.0%, religion cases made up 1.5%, and color accounted for 1.1%;
- almost three-quarters of the complaints (74.0%) were filed in Cuyahoga County.

The Housing Center also examined how complaints have changed over time in the region, to determine whether certain types of discrimination were being alleged more (or less) over time.²⁴ Since 2000, the total number of complaints filed has increased, from 87 in 2001 to 114 in 2007.

Because of the possibility that any particular year could have an unusually large or small number of complaints filed in a given category, we also examined the number of complaints filed in two five-year periods (1998-2002 and 2003-2007) to ascertain whether the types of complaints being filed recently differed from those being filed earlier. This analysis revealed the following:

- in the last five years (2003-2007), there were 701 complaints filed with HUD, for an average of 140.2 complaints annually, up from 374 complaints (74.8 annually) filed in the previous five year period (1998-2002);
- complaints based on race made up 34.5% of the total from 2003-2007, down slightly from 36.9% in the period 1998-2002;
- in the last five years, complaints based on disability made up 32.8% of the complaints, up from 27.0% in the previous five-year period;
- in the last five years, complaints based on familial status decreased to 12.8% of the total, down from 16.3% in the preceding five-year period;
- from 1998-2002 to 2003-2007, complaints based on sex/gender have increased from 3.5% of the total to 4.0% of the total; complaints based on national origin have increased from 4.5% of the total to 6.1% of the total, and complaints based on religion have

²³For purposes of this report, we considered each basis raised as a complaint. Thus, if an individual filed a charge alleging discrimination based on both race and gender, we counted this as two separate complaints. In our two previous reports, we combined HUD complaints with Ohio Civil Rights Commission complaints; however, because of the way that the two agencies reported their data this year, we determined that the two databases did not contain comparable data, and we therefore decided to only examine HUD complaints for this report. For details of the Housing Center's methodology, see Appendix C.

²⁴While an increase in cases filed could result from an increase in discrimination, it also could be due to other factors, such as increased monitoring of discrimination, increased knowledge of the law, or other factors. Likewise, a decrease in the number of cases filed does not necessarily represent a decrease in discrimination on that basis.

decreased from 2.7% of the total to 1.9% of the total.

By comparison, in fiscal year 2007, HUD reported that 43% of fair housing complaints filed nationally were based on disability discrimination, 37% were based on race, and 14% were based on familial status.²⁵

Table 10: Number and Basis of Fair Housing Complaints filed with HUD in the Region²⁶

	Race	Color	Religion	National Origin	Sex/ Gender	Familial Status	Handicap/ Disability	Retaliation	Total
1990	55	0	0	3	3	47	6	0	114

Total	849	23	31	121	91	364	472	76	2027

Source: HRAC analysis of HUD data.

The Housing Center also undertook an analysis of the number of complaints filed per 100,000 residents each year in the region.²⁷ This analysis revealed an average of 5.1 complaints filed per year for each 100,000 people in the six-county region. Cuyahoga County had the highest incidence of housing complaints based on population size in the region (6.1 per 100,000), while Geauga County had the lowest incidence (1.8 per 100,000). In terms of complaints based on race, the overall incidence was 2.1 complaints per 100,000, with a high of 2.8 per 100,000 in Cuyahoga County and a low of 0.9 per 100,000 in Geauga County.

²⁵See HUD, "State of Fair Housing: FY 2007 Annual Report on Fair Housing," available at www.hud.gov/offices/fheo/library/FairHousing-FY2007AnnualReport.pdf.

²⁶County-level data are presented in Appendix B, below.

²⁷To calculate the number of complaints per 100,000 people, the Housing Center divided the average number of complaints per year for each jurisdiction by the mean of the total population in 1990 and 2006 and then multiplied this amount by 100,000.

The different rates of cases filed in different counties is likely due to a number of factors in addition to differential rates of discrimination, including the racial and ethnic make-up of the region, the relative amount of rental housing, housing mobility rates, and the presence or absence of fair housing organizations in the counties who might educate and assist potential victims of discrimination and conduct systemic testing.

C. Incidence of Housing Discrimination in the Region

Although there were 114 complaints of housing discrimination filed in 2007 in the region, the actual incidence of housing discrimination is undoubtedly much higher. To date, there has been no systematic study of the rate or total number of instances of housing discrimination in the region.²⁸

In 2003, the Urban Institute prepared a report for HUD which found that nationwide, housing discrimination occurred in 20.3% of the cases in which African Americans attempted to rent an apartment and 16.8% of the cases in which African Americans attempted to purchase a home. For Hispanics/Latinos, the report found discrimination 23.4% of the time in rentals and 18.3% of the time in home sales.²⁹

Although the report found some variability across metropolitan areas, the overall levels of discrimination in the localities studied were not significantly different from the national averages, and the report concluded that “discrimination against African American and Hispanic homeseekers remains a problem in large metropolitan areas nationwide – that no region of the country or group of metropolitan areas is exempt.”³⁰

A later Urban Institute report prepared for HUD examined discrimination against Asians and Pacific Islanders, finding discrimination in 21.5% of the cases involving rentals and 20.4% of the cases for home sales.³¹

Using the data collected for the Urban Institute/HUD report, the National Fair Housing Alliance commissioned several reports on the total number of instances of housing discrimination each

²⁸The Fair Housing Resource Center, in Painesville, Ohio, found housing discrimination against people with disabilities in 38% of cases in Lake County. FHRC, “Is Our Nation Moving Towards a Dual Society: One Able and One Disabled - Separate and Unequal? Discrimination in Lake County Housing Market, 2004-2005 Report.”

²⁹Urban Institute, “Discrimination in Metropolitan Housing Markets: Phase I - Supplement” (February 2003), pp. 3-1 and 3-4, available at www.hudclips.org.

³⁰Urban Institute, “Discrimination in Metropolitan Housing Markets: Phase I” (November 2002), p. 8-6, available at www.hudclips.org.

³¹Urban Institute, “Discrimination in Metropolitan Housing Markets: Phase 2 - Asians and Pacific Islanders” (March 2003), p. iv, available at www.hudclips.org.

year. These reports found that nationwide, there was a minimum of 3.7 million instances of housing discrimination annually. In its report, NFHA noted that this was a low estimate, as it was based on the Urban Institute's data, which covered only discrimination based on race (against African Americans, Asians and Pacific Islanders, and Native Americans) and against Hispanics/Latinos and which did not capture all types of discrimination against these groups.³²

To estimate the incidence of housing discrimination in the region, the Housing Center has used the methodology developed for the NFHA reports by comparing the rate of discrimination found by the Urban Institute in its reports with mobility rates for renters and homebuyers in the northeast Ohio region in 2004, the most recent available.

Using the Urban Institute data, which the Housing Center believes likely understate the rates of discrimination, the Housing Center estimates that there are annually at least 33,690 instances of housing discrimination based on race and national origin in the six-county region.³³

³²See National Fair Housing Alliance, "2004 Fair Housing Trends Report," April 7, 2004, pp. 1-5. Among the limitations with the HUD data, NFHA noted that the research excluded many smaller owner-occupied housing units which comprise a significant portion of the rental market, did not account for discrimination that occurred at the preliminary telephone contact stage, and did not account for discrimination that occurred after an applicant submitted an application. *Id.* at 5.

³³The Housing Center's methodology in deriving this estimate is found in Appendix D.

V. Racial and Ethnic Segregation in Northeast Ohio

One of the most common measures of the segregation of a region is the dissimilarity index. This index measures the percentage of a minority population who would have to move from one neighborhood to another neighborhood in order to achieve complete integration. Using the dissimilarity index, a score of 0.0 would represent a completely integrated distribution of individuals, while a score of 1.0 would be a situation in which both groups (e.g. races) were completely segregated and in which every member of the minority group (e.g. African Americans) would have to move in order to achieve complete integration.

Using the dissimilarity index, the Cleveland region has become somewhat less racially segregated for African-Americans, moving from the third most-segregated large metropolitan area in the country for African Americans in 1980 to the sixth most-segregated in 2000. During this period, the MSA's ranking on the dissimilarity index has improved from a score of 0.854 in 1980 to 0.824 in 1990 to 0.768 in 2000.

Table 11: Residential Segregation for African Americans in Large Metropolitan Areas Ranked by Dissimilarity Index

	1980	1990	2000
Rank	MSA/PMSA Name	MSA/PMSA Name	MSA/PMSA Name
1	Chicago	Detroit	Detroit
2	Detroit	Chicago	Milwaukee-Waukesha
3	Cleveland-Lorain-Elyria	Milwaukee-Waukesha	New York
4	Milwaukee-Waukesha	Newark	Newark
5	Fort Lauderdale	Cleveland-Lorain-Elyria	Chicago
6	Newark	New York	Cleveland-Lorain-Elyria
7	St. Louis	Buffalo-Niagara Falls	Buffalo-Niagara Falls
8	New York	St. Louis	Cincinnati
9	Los Angeles-Long Beach	Bergen-Passaic	St. Louis
10	Bergen-Passaic	Philadelphia	Nassau-Suffolk

Source: U.S. Census.

While these measures show a slight improvement for the region, the continued out-migration of population from the region, and from Cuyahoga County in particular, presents risks for potential re-segregation, or at least for a slowing of the integration in the region. As many researchers have noted, the areas of the country which have shown the most gains in terms of residential integration have been those in the south and west which have experienced the largest population growth.³⁴ In fact, of the 10 most segregated large metropolitan areas in 2000, all are in the Northeast or Midwest, while Fort Lauderdale (which ranked fifth most-segregated in 1980) and Los Angeles (which ranked ninth in 1980) have dropped to twenty-ninth and nineteenth, respectively.

³⁴See, e.g., Robert L. Smith and David Davis, "Migration Patterns Hold Back Cleveland," *Plain Dealer*, December 30, 2002.

Segregated housing patterns affect the ability of African American families to build wealth through home ownership. A recent report sponsored by the Brookings Institute concluded that a “segregation tax” is imposed on African American homeowners due to the decreased value of property in predominantly minority neighborhoods.³⁵ According to this report, the Cleveland area suffers from a “tax” of 24%, meaning that for each dollar of income, African American homeowners have 24% less in home values compared to whites with the same income. While this “tax” is not formally assessed or collected by any governmental body, the lower amount of wealth that African Americans are able to accumulate has a real effect on their wealth and the amount of money they can pass on to their children.

With regard to segregation for Hispanics/Latinos, the situation as a whole is more complicated. Overall, Hispanics/Latinos in the region are less segregated than African Americans. Moreover, the Cleveland region has gone from being the seventh most-segregated large metropolitan area for Hispanics/Latinos in 1980 to the eleventh most-segregated in 2000. However, this “improvement” has come not from any decrease in segregation of Hispanics/Latinos in the region; the dissimilarity index has actually *increased* slightly from 1980, when it was 0.575, to 2000, when it stood at 0.577. Thus, the “improvement” has come about because other regions have become more segregated, overtaking the Cleveland region with regarding to segregation of Hispanics/Latinos.

Table 12: Residential Segregation for Hispanics/Latinos in Large Metropolitan Areas Ranked by Dissimilarity Index

VI. Mortgage Lending Disparities in Northeast Ohio

Historically, many lending institutions engaged in discrimination against racial and ethnic minorities and in “redlining,” in which individuals living in minority neighborhoods were denied access to mortgage credit.³⁶ Although discrimination in mortgage lending and redlining were made illegal by the Fair Housing Act in 1968 and are also prohibited by Ohio law, many recent studies have found continuing racial disparities in mortgage lending based on race.³⁷

In order to assess whether such disparities continue to exist in northeast Ohio, the Housing Center analyzed 2006 mortgage lending data (the most recent available) for the six counties covered by this report.³⁸

This report focuses on two aspects of the 2006 Home Mortgage Disclosure Act (HMDA) data: loan denial rates and “high-cost” lending rates based on race, ethnicity, and income.³⁹ These two measures were selected to determine if there were racial and/or ethnic disparities in who was denied loans and, for those who actually received loans, who received high-cost loans. Denial rates are important in determining whether individuals of different races have fair access to credit in order to purchase a home or to refinance their mortgage. High-cost lending rates provide further evidence of possible biases in the lending industry for those individuals who are approved for loans. Loans made for home purchases and refinancing were examined separately to determine if there were any significant differences between the two groups.

³⁶See, e.g., HUD Preamble I, 53 Fed. Reg. 44998 (Nov. 7, 1988).

³⁷See, e.g., National Community Reinvestment Coalition, “Income is No Shield Against Racial Differences in Lending: A Comparison of High-Cost Lending in America’s Metropolitan Areas,” July 2007; Fishbein, Allen J. and Patrick Woodall, “Subprime Locations: Patterns of Geographic Disparity in Subprime Lending,” Consumer Federation of America, September 5, 2006; Bocian, Debbie Gruenstein, Keith S. Ernst & Wei Li, “Unfair Lending: The Effect of Race and Ethnicity on the Price of Subprime Mortgages,” Center for Responsible Lending, May 31, 2006; Munnell, Alicia H., *et al.*, “Mortgage Lending in Boston: Interpreting the HMDA Data,” Federal Reserve Bank of Boston Working Paper No. 92-7 (1992).

³⁸This report used mortgage lending data provided by lenders to the federal government under the Home Mortgage Disclosure Act (HMDA), 12 U.S.C. §2801, et seq. This statute requires most mortgage lenders - including banks, savings and loan associations, credit unions, and mortgage and consumer finance companies - located in metropolitan areas to report certain data regarding their loans to the federal government and members of the public.

³⁹The term “high-cost lending” refers to mortgage loans in which the annual percentage rate (APR) is more than 3% (or, for second-lien mortgages, 5%) above the rate on Treasury securities of comparable maturity. “High-cost lending” is not synonymous with “subprime lending” or “predatory lending.” High-cost lending is a more narrow category than “subprime” lending, and some subprime loans are likely not counted among the loans identified in this report. Further, while many “predatory” loans are likely included in the high-cost category, not all loans in this category are necessarily predatory, and some predatory loans may not meet the threshold triggers.

A. Loan Denial Rates

As Chart 1 shows, for both home purchase loans and refinance loans, denial rates were highest for African Americans (39.9% and 51.4% denied, respectively), followed by Hispanics/Latinos (23.4% and 46.5%), Asians (14.7% and 37.6%), and whites (13.7% and 34.5%).⁴⁰

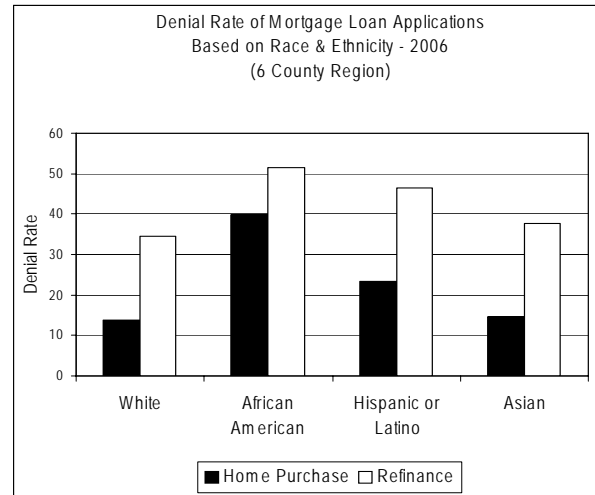

The Housing Center further examined denial rates based on race and income, comparing denial rates for African Americans and whites in two income groups: low income, which consists of individuals with income less than 50% of the median income in the region, and upper income, which represents individuals with income greater than 120% of the median income. By adding income to the analysis, the Housing Center attempted to control for some of the borrower characteristics that could explain the discrepancies in high-cost loan rates based on race and ethnicity.

It is expected that upper income individuals would have lower denial rates for mortgage lending than low income individuals. This expected pattern is found when one examines denial rates within racial groups for both home purchase and refinance loans: low income whites were denied loans at higher rates than upper income whites, and low income African Americans had higher denial rates than upper income African Americans.

However, when one examines income and denial rates *between* racial groups, the results show that African Americans were denied loans at disproportionate rates. In the region, upper income African Americans were denied home purchase loans 37.5% of the time, compared to 10.2% of the time for upper income whites and 25.5% of the time for low income whites (see Chart 2). For refinance loans, upper income African Americans were denied loans 45.4% of the time, compared to 29.9% of the time for upper income whites and 45.1% of the time for low income whites (see Chart 3).

The fact that upper income African Americans were denied loans at higher rates than low income whites provides evidence of possible illegal discrimination in the mortgage market and gives rise to concerns that African Americans are not obtaining access to mortgage lending on the same basis as whites.

Chart 1

⁴⁰Denial rates were calculated by dividing the number of loan applications denied by the sum of the number of applications originated, the number of applications approved but not accepted by the applicant, and the number of applications denied.

Chart 2

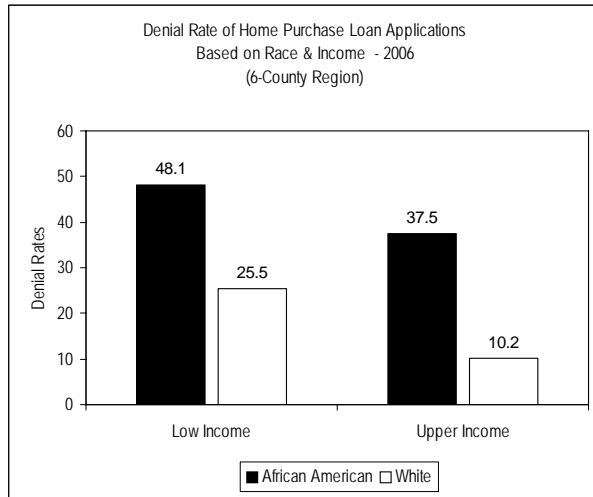

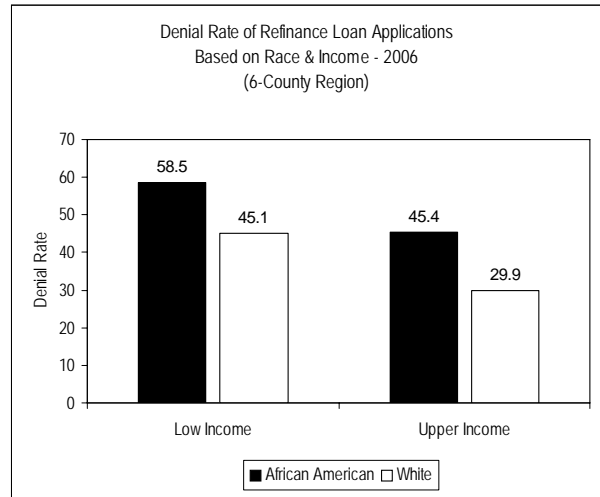

Chart 3

B. High-Cost Lending Rates

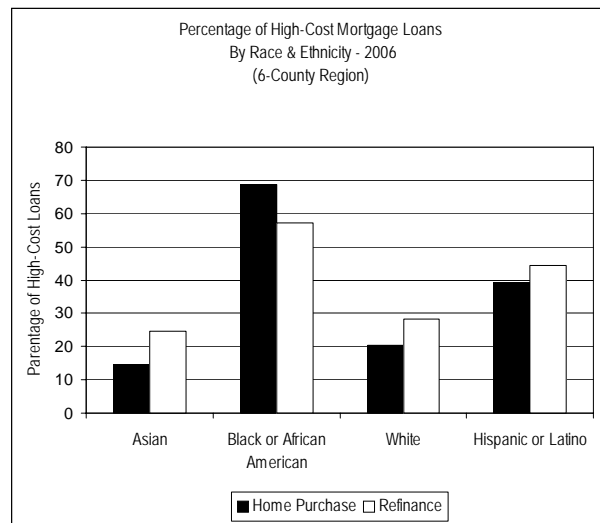

The rates of high-cost lending were examined to determine whether certain racial and ethnic groups were receiving disproportionately more high-cost loans than other groups. While disparities in high-cost lending by themselves are not proof of illegal discrimination, they represent a “useful screen” for determining where further investigation is necessary.⁴¹

For home purchase loans, African Americans had the highest incidence of high cost lending (68.7% of loans), followed by Hispanics/Latinos (39.3%), whites (20.3%), and Asians (14.7%).

The rates of high cost lending for refinance loans showed a similar pattern, with African Americans receiving such loans 57.1% of the time, Hispanics/Latinos 44.4%, whites 28.2%, and Asians 24.7%. (See Chart 4.)

In addition to looking at the incidence of high-cost lending by racial and ethnic groups, the Housing Center also examined high-cost lending for different income groups within and between racial and ethnic groups. The purpose of this second stage of the research was to determine if income could explain the variance in types of loans received. That is, because whites as a group

Chart 4

⁴¹FFIEC, “Frequently Asked Questions About the New HMDA Data,” April 3, 2006, p. 5, available at <http://www.federalreserve.gov/boarddocs/press/bcreg/2006/20060403/attachment.pdf>.

have higher incomes than African Americans as a group, do these differences account for the overall racial and ethnic disparities in high-cost lending.

In examining high-cost lending rates based on income and race/ethnicity, these racial and ethnic disparities were still present. For home purchase loans, African Americans at all income levels received more high cost loans than individuals from any other racial/ethnic and income group. Upper income African Americans received high cost home purchase loans 62.8% of the time, compared to only 14.8% of the time for upper income whites and 24.5% for low income whites. The data for refinance loans also showed African Americans received a disproportionate amount of high cost loans, ranging from 55.3% for low income African Americans to 55.8% for upper income African Americans. Low income whites, by contrast, received high cost refinance loans 32.0% of the time, and upper income whites received them only 24.3% of the time. (See Charts 5 and 6.)

Chart 5

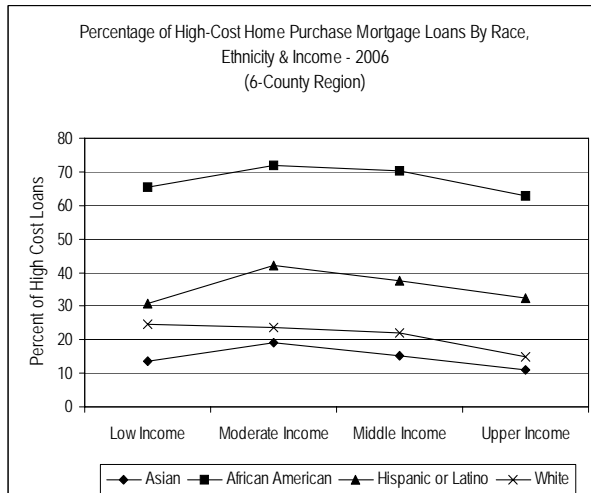

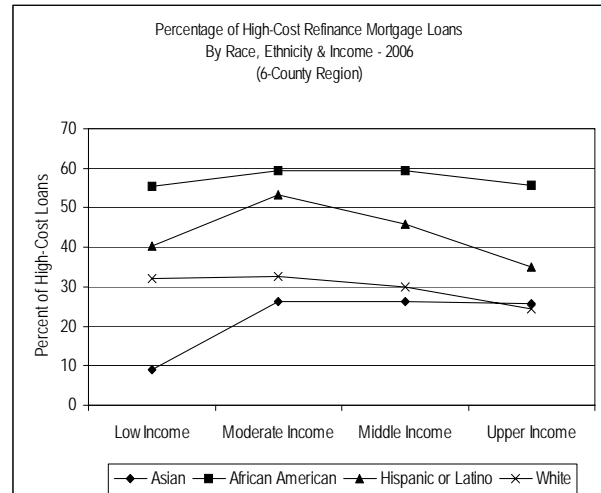

Chart 6

The results of the analysis of mortgage lending presented in this report show a disturbing pattern: African Americans were denied mortgage loans at greatly disproportionate rates compared to whites, and when they obtained such loans, they wound up receiving high-cost loans much more often than whites. In addition, Hispanics/Latinos were denied mortgage loans and obtained high-cost loans at greater rates than whites, although not at rates as high as African Americans. These data raise great concerns that African Americans and Hispanics/Latinos are not obtaining equal access to the mortgage lending market in northeast Ohio compared to whites.

These findings by the Housing Center are consistent with other national and regional studies that have identified racial and ethnic disparities in mortgage lending. For example, a report published by the Federal Reserve noted that the 2006 HMDA data “indicate that black and Hispanic borrowers are more likely, and Asians [sic] borrowers less likely, to obtain loans with

prices above the HMDA pricing reporting thresholds than are non-Hispanic white borrowers.” While the report stated that some of this disparity could be explained for by “borrower-related factors” (wealth or credit history, for example) or the individual lender chosen, it also noted that not all of the discrepancy is explained by such variables.⁴²

A recent study by the Consumer Federation of America that examined a sample of the 2005 HMDA data also found that African American and Hispanic/Latino homeowners were more likely to receive higher-priced refinance loans than other racial and ethnic groups.⁴³ In addition, a December 2005 report published by the Joint Center for Housing Studies at Harvard University found that high-cost lenders disproportionately target minority, and especially African American, borrowers and neighborhoods.⁴⁴

While this evidence reveals a clear picture of racial and ethnic disparities in mortgage lending, it is not possible to definitively conclude that all of this disparity is due to illegal discrimination based solely on HMDA data. Some of the discrepancy could be due to other factors, such as differences in wealth, credit scores, the loan-to-value (LTV) and debt-to-income (DTI) ratios of borrowers, as well as to borrowers approaching different lenders.

However, other research has found that, while these other factors may account for some of the racial and ethnic disparities, they do not account for it all. For example, in a report released in May 2006, the Center for Responsible Lending combined HMDA data with credit information from a proprietary database. The report concluded that even controlling for legitimate risk factors (such as credit scores of borrowers, loan-to-value ratios, and other underwriting factors), African American and Hispanic/Latino borrowers are more likely to receive high-cost loans than white borrowers.⁴⁵

More importantly, even if some of the disparity is accounted for by these other factors, there is strong evidence that differences in wealth, credit history, and other similar factors are themselves the product of historic and current racial discrimination. The fact that whites have greater wealth than African Americans and Hispanics/Latinos is due in large part to homeownership rates, both current and in the property that has been passed down over one or more generations. These differences in homeownership rates were – and still are – impacted by racial discrimination in home ownership and lending, which, until the passage of the Fair Housing Act in 1968, was legal

in much of the country. Similarly, credit scores and income are impacted by levels and quality of education, which are also to a large degree a product of where people live.

To argue that the racial disparities that exist in mortgage lending can be explained by underwriting guidelines or other such “borrower characteristics” is simply an admission that our society has produced great inequalities in these areas based on race and that we will continue to tolerate such inequity. Rather than reaching for such excuses, the Housing Center believes that we must address not only current racial disparities and illegal discrimination in mortgage lending but also develop remedies to address the lingering effects of past discrimination.

VII. Recommendations

On April 11, 1968, just one week after the assassination of the Reverend Dr. Martin Luther King, Jr., President Lyndon Johnson signed the federal Fair Housing Act. The Act was seen by some as one of the means to address the racial divide that had been documented by the Kerner Commission in its February 1968 report that had concluded in candid terms “Our Nation is moving toward two societies, one black, one white – separate and unequal.”⁴⁶

As we noted at the outset of this report, housing discrimination affects not only whether or not an individual will be able to rent a given apartment or purchase a particular house. It also significantly affects people’s lives in many other areas, including what type of neighborhood they can live in, the schools their children attend, their access to transportation and jobs, and the amount of wealth they are able to build due to home equity.

Despite the passage of the Fair Housing Act and the relief it has brought to some individuals in the past 40 years, racial and other forms of housing discrimination and segregation continue to be prevalent in northeast Ohio and throughout much of the country. Many of our neighborhoods remain significantly segregated, and poverty continues to be concentrated among racial and ethnic minorities.

While this report outlines many areas in which our region has significant work to accomplish, we also believe that there are concrete steps that government officials and others can take that will have a positive impact on the state of fair housing in our region. To help accomplish this goal, the Housing Research & Advocacy Center recommends the following:

- 1) **Fair housing laws must be strengthened.** Fair housing laws should protect a broader class of individuals than are currently protected by federal and state law. The Housing Center believes that local governments should follow the lead of some of the cities identified in this report and prohibit discrimination based on their sexual orientation, marital status, and age.

In addition, the Housing Center urges local governments to prohibit discrimination based on source of income, to ensure that individuals who use housing subsidies (such as “Section 8 vouchers”) are not discriminated against on that basis. In its research, the Housing Center did not find any local jurisdiction which prohibited discrimination based on source of income, although such discrimination is prohibited nationally in a number of states and cities. Adding protection based on source of income is one step that local and regional governments can take to help ensure that economic segregation does not replace the racial discrimination that we currently suffer.

⁴⁶Report of the National Advisory Commission on Civil Disorders (“Kerner Commission”), February 29, 1968.

- 2) **Fair housing laws must be enforced more vigorously.** While having strong laws is important, without vigorous enforcement housing discrimination will continue. Housing discrimination is not always easy to detect. While a generation ago it might not have been uncommon for housing providers to openly state that they would not rent to African Americans, for example, now discrimination often occurs in more subtle forms, such as refusing to return telephone calls from individuals with African American dialects or speech patterns, falsely stating the an available dwelling is no longer available, or changing the terms or conditions of a home purchase or rental based on a protected characteristic.

It is the responsibility of federal, state, and local governments to work to ensure that all citizens have a fair opportunity to rent and purchase housing in cities and neighborhoods they desire. Moreover, it is a legal obligation of governments that receive Community Development Block Grant (CDBG) and other HUD funds to take actions that “affirmatively further fair housing.”

A vigorous enforcement strategy should include an adequate testing program to ensure that discrimination is both deterred and detected. In cases where housing discrimination is found, governments must take strong action to ensure that those found guilty are punished, both as a means of compensating the victims as well as deterring future violations.

In addition, even though the Fair Housing Act’s accessibility provisions for multi-family housing have been in place for over 17 years, new housing is still being built in violation of these provisions. Governments at all levels must ensure that these requirements are complied with to ensure that the region’s housing stock becomes more accessible.

- 3) **Increased resources must be devoted to educating the public and housing providers regarding fair housing laws.** While most individuals likely know that discrimination based on race or religion in housing is illegal, some housing providers are still unaware that discrimination based on familial status and handicap/disability are prohibited. Additionally, many victims of housing discrimination are unaware of their rights under federal, state, and especially local laws, and of the procedures they may use to vindicate those rights. As such, increased resources must be devoted to educating “both sides” about fair housing laws and procedures, as well as where individuals may turn for help if they have questions or believe their rights have been violated.
- 4) **Increasing investigations of mortgage lenders to ensure that they are adequately complying with the Fair Housing Act and other anti-discrimination statutes to provide fair access to credit.** In the past several years, the mortgage and foreclosure crisis has devastated much of northeast Ohio. Foreclosures, many caused by subprime and predatory lending, have reached record levels, with harmful effects for homeowners, neighbors, communities, and the region as a whole.

However, the response of many lenders has been to defer any responsibility for their actions, claiming that the Community Reinvestment Act (CRA) is to blame by requiring depository institutions to make loans to low and moderate income individuals and communities. In doing so, these individuals and institutions focus solely on the provision of credit, without regard to its terms.

The concern of community development advocates, fair housing organizations, and others is *fair* access to credit. Providing credit on usurious or unsustainable terms can be as damaging to a community as not providing credit at all. The Housing Center therefore calls on mortgage lenders to fulfill their obligations under the CRA to provide fair access to credit to all geographic and racial/ethnic communities in northeast Ohio.

In the fall of 2005, the Federal Reserve Board identified approximately 200 lending institutions for review by federal regulators to determine if they were discriminating against minorities by charging them higher rates. To date, no further information has been released on any of these investigations, including even identifying the lenders under investigation. The Housing Center strongly urges federal, state, and local regulatory agencies and departments to undertake thorough investigations of mortgage lenders to ensure that they are complying with all applicable anti-discrimination laws.

In addition, the Housing Center believes that creative mechanisms must be developed to ensure that African Americans, and other racial and ethnic minorities, are not penalized in the mortgage underwriting process, through the use of credit scores, credit histories, and other screening tools, that themselves reflect and reproduce historic racial and ethnic discrimination.

5) **Government incentives should be provided to help achieve housing integration.**

Forty years after the passage of the Fair Housing Act, we continue to live in a region that is highly segregated, particularly for African Americans. At the current rate of “progress,” it will take decades for the region to become integrated. Governments should develop creative mechanisms to help address housing discrimination, possibly including the use of financial incentives for individuals making diversifying moves. For example, tax incentives, such as a state tax credit, could be offered to individuals who make a racially diversifying move.

In addition, local land use codes and regulations must be examined and revised to ensure both that individuals and groups are not discriminated against and that such policies do not exacerbate regional sprawl, further weakening our region and worsening economic segregation.

While these recommendations are broad and will require investment of time and resources, the Housing Center believes that they will greatly strengthen our region and provide benefits in many areas, making our region not only more just and equitable but stronger financially.

Appendix C

Methodology for Calculating Fair Housing Complaint Data

In Ohio, fair housing cases may be filed with the U.S. Department of Housing and Urban Development (HUD), the Ohio Civil Rights Commission (OCRC), or sometimes with local fair housing agencies. Based on our research, we have concluded that few if any cases were filed solely with other local agencies.

Because of an agreement with HUD, fair housing cases filed directly with the OCRC are also logged into HUD's database ("TEAPOTS") if the complaint alleges a basis of discrimination that is found under both federal and state law. In addition, cases from Ohio that are filed with HUD are generally referred to the OCRC for investigation unless there is a potential conflict of interest in such an arrangement. This results in most OCRC cases also being found in HUD's database and vice versa.

In past years, we have combined the HUD and OCRC data in an attempt to arrive at the most accurate number of complaints filed in the region. However, reporting differences between the TEAPOTS database used by HUD and the OCRC's database prevented us from combining these sources.⁴⁷ Because most cases included in the OCRC fair housing cases should be included in the HUD database, we believe that this data represents most of the fair housing complaints filed in the region.

For purposes of the chart, we considered each alleged basis of discrimination as a separate "complaint." Therefore, if someone filed a charge alleging discrimination based on race and gender, we counted that as two complaints and placed it in each column, even if it arose in only one charge form. HUD classifies some cases as having a basis of "retaliation", and although retaliation is not a basis of discrimination under either federal, state, or local law, we included a separate category of retaliation in the charts since the HUD data separated this category from the bases of discrimination.

⁴⁷For example, HUD tracks cases by the location of the property, while the OCRC tracks them by the respondent's address. If a resident of Geauga County owns property in Cuyahoga County and discriminates against a potential tenant, the case would be reported under Cuyahoga County by HUD but under Geauga County by the OCRC.

Appendix D

Methodology for Calculating Instances of Housing Discrimination

The Housing Center estimates that there were at a minimum 33,690 instances of housing discrimination against African Americans, Hispanics/Latinos, and Asian Americans in 2005 in the six-county region.

This estimate was calculated using the methodology developed by Professor John Simonson, from the University of Wisconsin, Platteville, in a series of papers he produced in 2004 for the National Fair Housing Alliance estimating the number of instances of discrimination nationwide.⁴⁸

In reaching our estimate of the number of instances of discrimination, we first determined the rate of discrimination against African Americans, Hispanics/Latinos, and Asian Americans using Professor Simonson's methodology. For renters, this methodology takes into account the number of housing units a typical renter inspects before choosing housing, as well as the rate of discrimination at specific instances in the housing search process. For homeowners, it takes into account the average number of real estate agents a typical homeowner consults in the course of a housing search. We then multiplied this overall rate of discrimination for each group by the number of individuals in each group (renters and homeowners) who had moved in 2004 in the Cleveland metropolitan area (the most recent data available) based on the American Housing Survey.⁴⁹ This corresponds to 26,687 instances of discrimination among renters and 3,190 instances among homeowners, for a total of 29,877 instances of discrimination in these five counties.

The Housing Center then adjusted for the population of Lorain County, assuming that for both

⁴⁹U.S. Department of Housing and Urban Development and U.S. Census Bureau, Current Housing Reports, Series H170/04-45, "American Housing Survey for the Cleveland Metropolitan Area: 2004," Table 3.1. Introductory Characteristics - Owner Occupied Units and Table 4.1. Introductory Characteristics - Renter Occupied Units. The AHS survey reports data for Ashtabula, Cuyahoga, Geauga, Lake, and Medina Counties. Lorain County is not included in its data. In making these calculations, the Housing Center assumes that discrimination rates in the region correspond to those found nationally by HUD in its survey. Although HUD found some variability across metropolitan areas, the overall levels of treatment were not significantly different from the national averages, and the report concluded that "discrimination against African American and Hispanic homeseekers remains a problem in large metropolitan areas nationwide – that no region of the country or group of metropolitan areas is exempt." Urban Institute, "Discrimination in Metropolitan Housing Markets: Phase I" (November 2002), p. 8-6, available at www.hudclips.org.

renters and homeowners, housing mobility for African American (as well as Hispanic/Latino and Asian American) households in Lorain County was consistent with the rates in the rest of the Cleveland region.⁵⁰ Using this formula, the Housing Center estimated an additional 3,813 cases of housing discrimination in Lorain County (3,529 among renters and 284 among homeowners) against African Americans, Hispanics/Latinos, and Asian Americans/Pacific Islanders, making a total of 33,690 instances of discrimination based on these grounds alone.

The Housing Center considers this to be a conservative estimate for a number of reasons:

- the figures do not include discrimination against Native Americans, bi-racial individuals, or other racial/ethnic groups (such as Arab Americans, for example) due to data limitations;
- the data do not include discrimination based on other protected classes such as disability, familial status, religion, or sex/gender;
- the data only cover discrimination in the rental and home sale markets, and not discrimination in homeowners insurance or mortgage lending;
- the data are based on the Urban Institute's survey, which did not include many smaller units (which comprise a large proportion of the rental market), and did not include discrimination occurring at the initial telephone contact or after an application has been submitted by a housing seeker.

⁵⁰These rates were calculated for African American, Hispanic/Latino, and Asian American/Pacific Islander households for both renters and homeowners. We estimate that among renters in Lorain County, 1,534 African American households moved, 1,711 Hispanic/Latino households moved, and 145 Asian American/Pacific Islander households moved. Among homeowners in Lorain County, we estimate that 314 African American households moved, 321 Hispanic/Latino households moved, and 54 Asian American/Pacific Islander households moved.
